

St Anne's C of E Primary School Curriculum Plan

Subject: Maths

Year: EYFS

Term: All

Unit: Number

Vocabulary	Knowledge	Understanding	Skills
	Children will know (that)	Children will understand (that)	Children will be able to
<p>comparison cardinality- (the total number of elements in a set) subitising- (the ability to look at a small number of objects and instantly recognise how many objects there are without needing to count. composition- (Awareness that numbers can be composed of smaller numbers) ordinality -(putting numbers in order)</p> <p>zero number one, two, three....to ten and beyond none</p>	<ul style="list-style-type: none"> Some numbers are significant to them e.g. 'I am 5', 'I live at number 7'. Each number has a written symbol and a name Objects need to be counted one at a time. Actions can be counted. Objects must be counted accurately. 	<ul style="list-style-type: none"> Numbers can be found in a range of places e.g. on favourite toys, birth dates or telephone numbers. Different games such as hide and seek involve counting. Rhymes, songs and stories involving counting on and counting back in ones, twos, fives and tens. The concept of nothing or zero. They are encouraged to count the things they see and talk about and use numbers beyond ten. 	<ul style="list-style-type: none"> Use number names and symbols when comparing numbers, showing interest in large numbers Estimate numbers of things, showing understanding of relative size Recite numbers from 0 to 10 (and beyond) and back from 10 to 0 Put numerals in order 0 to 10 Subitise numbers to four and maybe five

<p>how many....?</p> <p>count, count (up) to, count on (from, to), count back (from, to)</p> <p>is the same as</p> <p>more</p> <p>less</p> <p>digit</p> <p>larger</p> <p>bigger</p> <p>greater</p> <p>fewer</p> <p>smaller</p> <p>less</p> <p>fewest</p> <p>smallest</p> <p>least</p> <p>most first, second, third... tenth last</p> <p>before after next</p> <p>between</p> <p>Guess how many...? estimate</p> <p>Add total altogether</p> <p>how many more to make..? how many altogether?</p> <p>one more, two more</p> <p>how many more is....</p> <p>take away</p> <p>how many are left?</p> <p>How many have gone?</p> <p>one less</p> <p>how much less is...?</p> <p>difference between subtract</p>	<ul style="list-style-type: none"> • The number of objects and written representations can be matched. • the number of objects can be estimated and checked. • the term 'altogether' when counting two sets of objects. • the term 'one more' and one less'. • Use a range of vocabulary linked to addition and subtraction. • Marks can be made to represent numbers. • Numbers and counting can be part of play. 	<ul style="list-style-type: none"> • Numbers are in a particular order. • Numbers can be identified by their written representation • Actions like jumps and claps can be counted. • How to count accurately objects up to 10. • They can estimate an amount using a range of strategies. • They can use mathematical vocabulary and demonstrate methods of recording, using standard notation where appropriate. • Objects can be compared using the terms 'more' and 'less'. • Amounts of objects can be shared between two or more people. • Objects can be grouped when counting. 	<ul style="list-style-type: none"> • Count out up to 10 objects from a larger group • Match the numeral with a group of items to show how many there are (up to 10) • Show awareness that numbers are made up (composed) of smaller numbers • Explore partitioning in different ways with a wide range of objects • Begin to conceptually subitise larger numbers by subitising smaller groups within the number, e.g. sees six raisins on a plate as three and three • Add one and subtract one with numbers to 10 • Explore and work out mathematical problems, using signs and strategies of their own choice, including (when appropriate) standard numerals, tallies and "+" or "-"

Year: EYFS

Term: All

Unit: Spatial awareness, shape, pattern and measure

Vocabulary	Knowledge	Understanding	Skills
	Children will know (that)	Children will understand (that)	Children will be able to
2d 3d Flat Solid Edges Vertices Faces Flat Solid Square	<ul style="list-style-type: none"> There are 2D shapes. There are 3D shapes. The correct vocabulary can be used to describe shapes e.g. flat, solid. 2D and 3D shapes have names. 	<ul style="list-style-type: none"> 2D shapes can be described as 'flat' shapes. 2D shapes have corners, sides and faces. 3D Shapes can be described as 'solid' shapes. 3D shapes have edges, vertices and faces. 	<ul style="list-style-type: none"> describe a 2d shape and identify the corners and sides describe a 3d shape and identify edges, vertices and faces distinguish between 2d and 3d shapes

<p>Oblong</p> <p>Circle</p> <p>Triangle</p> <p>Cube</p> <p>Cuboid</p> <p>Pyramid</p> <p>Above</p> <p>Below</p> <p>Next to</p> <p>Behind</p> <p>In front of</p> <p>Length</p> <p>Height</p> <p>Tallest</p> <p>Shortest</p> <p>Highest</p> <p>Weight</p> <p>Heavier than</p> <p>Lighter than</p> <p>Full</p> <p>half full</p> <p>empty</p> <p>container</p>	<ul style="list-style-type: none"> • Describe using positional language. • Use a variety of maths resources to create a pattern e.g blocks to create a pattern. • Use a variety of maths resources to build a model e.g. shapes to build a rocket. • Time has a meaning and can be measured eg with a timer • A clock shows the time • There are 7 days in a week and the names of these days • That the year is split into seasons and months 	<ul style="list-style-type: none"> • Particular vocabulary is used to describe 2D and 3D shapes. • Positional language can be used to describe the position on an object. • Objects can be ordered by length and height. • Objects can be ordered depending on their size and weight. • Shapes can be used to create patterns. • Shapes can be used to create pictures and build models. 	<ul style="list-style-type: none"> • sort and classify shapes eg in two hoops in outdoor area • Use spatial language, including following and giving directions, using relative terms and describing what they see from different viewpoints • Investigate turning and flipping objects in order to make shapes fit and create models; predicting and visualising how they will look (spatial reasoning) • Make simple maps of familiar and imaginative environments, with landmarks • Use informal language and analogies, (e.g. heart-shaped and hand-shaped leaves), as well as mathematical terms to describe shapes
--	---	--	---

<p>minutes</p> <p>hours</p> <p>days</p> <p>months</p> <p>years</p>			<ul style="list-style-type: none"> • Compose and decompose shapes, learning which shapes combine to make other shapes • Use own ideas to make models of increasing complexity, selecting blocks needed, solving problems and visualising what they will build • Spot patterns in the environment, beginning to identify the pattern “rule” • Choose familiar objects to create and recreate repeating patterns beyond AB patterns and begin to identify the unit of repeat • Enjoy tackling problems involving prediction and discussion of comparisons of length, weight or capacity, paying attention to fairness and accuracy • Become familiar with measuring tools in everyday experiences and play
---	--	--	--

			<ul style="list-style-type: none">• Order and sequence events using everyday language related to time• Begin to experience measuring time with timers and calendars• describe the position of an object eg above/ below/ next to/ in front of/ behind• compare two lengths to say which is longer/ shorter• compare two masses to say which is heavier/ lighter
--	--	--	---
