# St Anne's C of E Primary School Curriculum Plan

Subject: Maths

Year: 4

Term: Autumn

Unit: Addition and subtraction

Vocabulary	Knowledge	Understanding	Skills
	Children will know (that)	Children will understand (that)	Children will be able to
<p><b>Addition</b></p> <p><b>Add, more, and, make, sum, total, altogether</b></p> <p><b>Double</b></p> <p><b>Near double</b></p> <p><b>Half, halve</b></p> <p><b>One more, two more... ten more</b></p> <p><b>Addends</b> – the numbers added together to make the sum</p> <p><b>Subtraction</b></p>	<ul style="list-style-type: none"> <li>when multiples of 100 are added or subtracted, the sum or difference is always a multiple of 100.</li> <li>how to record exchanges</li> <li>when it is appropriate to use mental strategies and when to use written strategies</li> <li>numbers can be rounded to simplify calculations or to indicate approximate sizes.</li> <li>understand that they can use the same calculation methods learnt for three-</li> </ul>	<ul style="list-style-type: none"> <li>why exchanges are needed</li> <li>multiple exchanges within an addition</li> <li>when to exchange in different place value columns</li> <li>subtractions where there is more than one exchange</li> </ul>	<ul style="list-style-type: none"> <li>use concrete objects and pictorial representations to add and subtract</li> <li>use formal written methods of columnar addition and subtraction of up to 4-digit numbers</li> <li>use knowledge of rounding to estimate the answer to a calculation</li> <li>use inverse operations to check answers</li> <li>solve two-step problems in contexts</li> </ul>

<p><b>Take away, minus, fewer, less, difference between</b></p> <p><b>One less, two less... ten less</b></p> <p><b>Minuend</b> – a quantity or number from which another is to be subtracted</p> <p><b>Subtrahend</b> - a quantity or number to be subtracted from another.</p> <p><b>Equals</b></p> <p><b>Is equal to, is the same as</b></p> <p><b>Number bonds</b></p> <p><b>Number pair</b></p> <p><b>Number facts</b></p> <p><b>Part, part, whole</b></p> <p><b>Partition</b></p> <p><b>Recombine</b></p> <p><b>Missing number</b></p> <p><b>Tens boundary / Hundreds boundary</b></p> <p><b>Commutative</b> - involving the condition that a group of quantities connected by operators gives the</p>	<p>digit numbers when calculating four-digit numbers.</p>		<ul style="list-style-type: none"> <li>• use bar modelling to solve problems</li> <li>• recognise patterns between calculations to enable them to predict answers</li> <li>• Pupils can compare different methods of addition and subtraction</li> </ul>
---	---	--	--

same result whatever the order of the quantities involved, e.g. $a \times b = b \times a$ .

# St Anne's C of E Primary School Curriculum Plan

Subject: Maths

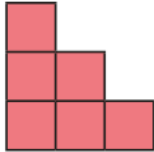

Year: 4

Term: Autumn

Unit: Area

Vocabulary	Knowledge	Understanding	Skills
	Children will know (that)	Children will understand (that)	Children will be able to
<b>Area</b> <b>Square millimetres</b> <b>Square centimetres</b> <b>Square metres</b> <b>Rectilinear</b> <b>Right angles</b> <b>Length</b> <b>Width</b> <b>Covers surface</b>	<ul style="list-style-type: none"> <li>Area is the amount of space within a 2d shape</li> <li>A rectilinear shape is a 2d shape whose sides all meet at right angles (90 degrees)</li> <li>Area of a rectilinear shape can be found by counting the number of squares inside a shape</li> <li>Area is measured in square units eg square centimetres <math>\text{cm}^2</math></li> </ul>	<ul style="list-style-type: none"> <li><b>Practically counting squares is a first step to working out the area of a 2d shape eg this shape is <math>6\text{cm}^2</math></b></li> </ul>  <ul style="list-style-type: none"> <li><b>You need to be accurate- using counters to measure area would not be accurate as they do not tessellate</b></li> </ul>	<ul style="list-style-type: none"> <li>Recognise a right angle</li> <li>Keep an accurate record of which squares they have counted eg by placing a dot inside the square</li> <li>Distinguish between perimeter and area (see perimeter unit)</li> <li>Use the phrase 'square centimetre' (not cm squared)</li> </ul>

# St Anne's C of E Primary School Curriculum Plan

Subject: Maths

Year: 4

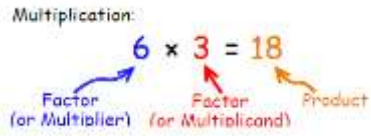

Term: Autumn and Spring

Unit: Multiplication and division

Vocabulary	Knowledge	Understanding	Skills
	Children will know (that)	Children will understand (that)	Children will be able to
<p><b>Multiplication</b></p> <p><b>Multiply</b></p> <p><b>Multiplied by</b></p> <p><b>Groups of</b></p> <p><b>Times</b></p> <p><b>Repeated addition</b></p> <p><b>Multiple</b> - The result of multiplying a number by an integer (not by a fraction).</p>	<ul style="list-style-type: none"> <li>the multiplication and division facts up to <math>12 \times 12</math>.</li> <li>any number multiplied by zero will have a product of zero.</li> <li>when a number is multiplied or divided by 1, the product or quotient remains the same.</li> <li>products in the 12 times table are double the products in the 6 times table.</li> <li>multiplying by 100 is equivalent to multiplying by 10 and then multiplying by 10 again.</li> <li>dividing by 100 is equivalent to dividing by 10 and then dividing by 10 again.</li> </ul>	<ul style="list-style-type: none"> <li>multiplication is commutative but division is not.</li> <li>making a number ten times bigger is the same as 'multiply by 10.'</li> <li>making a number a hundred times bigger is the same as 'multiply by 100.'</li> <li>what is happening to the place value of each digit when multiplying or dividing by 10 or 100.</li> <li>multiplication facts can be derived from related known facts by partitioning one factor (distributive law) e.g. <math>6 \times 3</math> can be found by <math>(2 \times 3) + (4 \times 3)</math>.</li> </ul>	<ul style="list-style-type: none"> <li>use concrete resources and pictorial representations to show multiplication and division, including multiplying and dividing by 10 and 100.</li> <li>count in equal groups of 6, 7 and 9.</li> <li>be able to use mental methods, e.g. partitioning to multiply two-digit numbers by one-digit numbers.</li> <li>be able to partition three-digit numbers into hundreds, tens and ones to multiply by a single digit number.</li> <li>be able to use formal written methods to multiply two-digit</li> </ul>

<p><b>Factor</b> - Numbers we can multiply together to get another number.</p> <p><b>Multiplicand</b> – The number to be multiplied</p> <p><b>Multiplier</b> – The number by which the multiplicand is multiplied by</p> <p><b>Product</b> – The result of a multiplication</p>  <p><b>Division</b></p> <p><b>Dividing</b></p> <p><b>Divide</b></p> <p><b>Divided by</b></p> <p><b>Divided into</b></p> <p><b>Grouping</b></p> <p><b>Sharing</b></p> <p><b>Shared equally</b></p>	<ul style="list-style-type: none"> <li>when using the 'short multiplication' algorithm, you start from the least significant digit (on the right) to the most significant digit (on the left).</li> <li>if the product in any column is ten or greater, we must 'regroup'.</li> <li>objects can be divided into equal groups and sometimes this leads to a remainder.</li> </ul> <p><b>Stem Sentences</b></p> <p>"The product of _____ and _____ is equal to the product of _____ and _____."</p> <p>"When zero is a factor, the product is always zero."</p> <p>"When the dividend is zero, the quotient is zero."</p> <p>"_____ is equal to _____ plus _____ so _____ times _____ plus _____ time _____ is equal to _____ times _____."</p>	<ul style="list-style-type: none"> <li>they can use the distributive law to derive multiplication facts beyond the known times tables.</li> </ul>	<p>numbers and three-digit numbers by one-digit numbers.</p>
--	---	---	--

<p><b>Left over</b></p> <p><b>Remainder</b></p> <p><b>Equal groups of</b></p> <p><b>Dividend</b> – The amount that you want to divide up.</p> <p><b>Divisor</b> – The number we divide by.</p> <p><b>Quotient</b> - The answer after we divide one number by another.</p> <p><b>dividend ÷ divisor = quotient.</b></p> <p><b>Commutative law</b> - The Law that says you can swap numbers around and still get the same answer when you add or when you multiply.</p> <p><b>Distributive law</b> - multiplying a number by a group of numbers added together is the same as doing each multiplication separately.</p>	<p>“Multiplying by one hundred is equivalent to multiplying by ten and then multiplying by ten again.”</p> <p>“If one factor is made ten times the size, the product will be ten times the size.”</p> <p>“If one factthe dividend is made ten times the size, the quotient will be ten times the size.”</p> <p>“If the dividend is a multiple of the divisor there is no remainder.”</p> <p>“If the dividend is not a multiple of the divisor, there is a remainder.”</p> <p>“The remainder is always less than the divisor.”</p>
